A must for every RapidShare user.BRSU president speaks on bifurcation of ZPHSU KHARKIV: BRSU president Dr. Babur Ali has spoken about possibilities of bifurcation of Zaporizhzhia Polytechnic University. He took part in the seminar on “Possibilities for the Development of Academic Education, Training and Research in the Technologies of Electronic Banking and Financial Sector” in the theme of the convention “Europe on the Way to New Innovations”, organized by the European Free Trade Union Institute. At the end of the seminar he was questioned by the journalists about the information given on the website of ZPUT. It was clarified that the ZPUT is not an exclusively Ukrainian university but it is under the control of the Ministry of Education and Science of Ukraine. However, the ZPUT has quite a high level of education and training and the main academic and scientific activities are conducted at the universities of Kharkiv and Odessa. Babur Ali noted that if there is a real need, when there is a demand, a decision of bifurcation can be taken. He said that the main aim of any university is to educate. “People are interested in what is being studied in the faculty, whether it is the first or the second university degree or the bachelor’s degree. But what matters is that students get to learn what they want to. As for bifurcation, they will need more university facilities, a more modern university. People go to the university not to study its leaders, they want to learn what they want to.” Dr. Babur Ali stressed that he was glad for the lectures held in a number of polytechnics and universities in recent years. Such an event was held in the polytechnic, for instance, more than 10 years ago. He is also concerned about the fate of the polytechnic in Zaporizhzhia. It is, he said, impossible to plan where schools will be located since it has to be built and the land is being privatized. In order to reconstruct the polytechnic, funds are being allocated, the facilities are being built

RapidShare Manager Crack Activator [Latest] 2022

The RapidShare Manager is an advanced software utility developed specifically to aid people in browsing and managing all their files from the RapidShare cloud storage, with support for logging in to multiple accounts.

Accounts Management There are several options to manage your RapidShare accounts, such as the option to view all accounts and change settings for each and every one of them. Additionally, it is possible to:

- set name, ID, type and direct link for every account;
- see the entire folder structure, as well as the list of contained files;
- export items to specific folders or the hard drive, or upload them from the Internet;
- change both the expiry and created date for every account;
- view the stats of all accounts;
- show a list of configured proxies;
- send emails from the program (no mail client needed);

Cloud Storage Management The program also offers a tab that contains all the information pertaining to your cloud storage, such as the date of creation, expiry, size, ID and the total number of files and folders.

- check the total space of all accounts;
- view a list of all files and folders;
- view the total number of items in a folder;
- open the folder structure;

Proxy Settings This utility also contains a tab that houses the settings for the proxies you would like to use to “access” your RapidShare accounts. It is possible to set both the maximum number of simultaneous connections and the maximum transfer speed for each type of proxy.

Email Settings The email settings dialog lets you manage the rules regarding your e-mails; for example, you can define how to receive them and, if required, set the folders in which they will be saved.

Snapshot Settings Snapshots can prove to be a useful tool in case something happens to your account, although it is up to you to decide how many are to be created for each account at once. The settings window allows you to define the maximum number of snapshots to be created and the total number of the storage space occupied for the snapshots.

Update Manager A tab is dedicated to telling you about the software updates that you may need, as well as providing links to download them. It is also possible to decide whether you want to update every account at once or only the ones that are not the latest.

Support Finally, this software can be found in the file section, while it is there you will find a free support e-mail address

What's New In RapidShare Manager?

RapidShare Manager is a free software designed for people who have an account with RapidShare and want to browse all their files from a cloud storage. This convenient software consists of a set of tools designed to make your cloud storage account more efficient, with emphasis on managing your files and folders, and letting you take beautiful snapshots of the entire screen or a selected region. It is possible to browse your RapidShare cloud storage from the main window, with no need to open different tabs or windows. You can preview the files and the folders contained within, as well as view any detailed information about them.

Moreover, you can also download the items to the desktop, as well as upload new ones and take direct downloads from a specified URL or a hard disk drive. Additionally, the tool can be used to view a folder structure, take a specific region or file and take snapshots. It is possible to save the files and folders as the JPG or PNG format, and also manage all active processes, while it is also possible to upload pictures to your account and take snapshots of the entire screen. Finally, you can view the corresponding Logs, block or email the items with ease, send emails with attachments or draft the messages to be sent at a later time. From the main window, you can go to the Logs tab, blocking or email messages tab to view the processes currently in place, while it is also possible to upload new items to RapidShare. You can also see the information regarding any file or folder, including expiry date, ID, size, expiry time, created date, last modified time and location.

RapidShare Manager Reviews: It is easy to use; The software has a free and useful toolset; There is no need for third-party apps; The response times are good.
